

Horse Harness Measurement instructions

Preferably all measurements in centimetres

If you don't have a material dress making tape use a piece of string to measure and then measure the lengths of string often the easiest way especially for the girth measurement.

We would normally supply two photos of well fitted harness to help guide you approximately to where the normal positions of harness would be.

It is almost impossible to be exact, to the nearest 2cm would generally be close enough!

Measurement A: Noseband

Measure all around the horse nose approximately 2.5cm (1") below the nose bone.

Measurement A1: Front Band / Browband

Measure around the front of the head below and past the ears to where bridle cheek pieces would be (not an essential measurement but useful - and can be measured from an existing well-fitting bridle).

Measurement B: Cheeks and Headpiece

Measure from corner of mouth all the way up and over the head behind ears and down to corner of mouth on the other side of head.

Measurement C: Neck Strap

Measure from the wither to the front middle of breast and

Measurement C3: Wither Strap

Measure directly down from the top of the wither too centre of where the breast collar would sit

Measurement D: Breast Collar

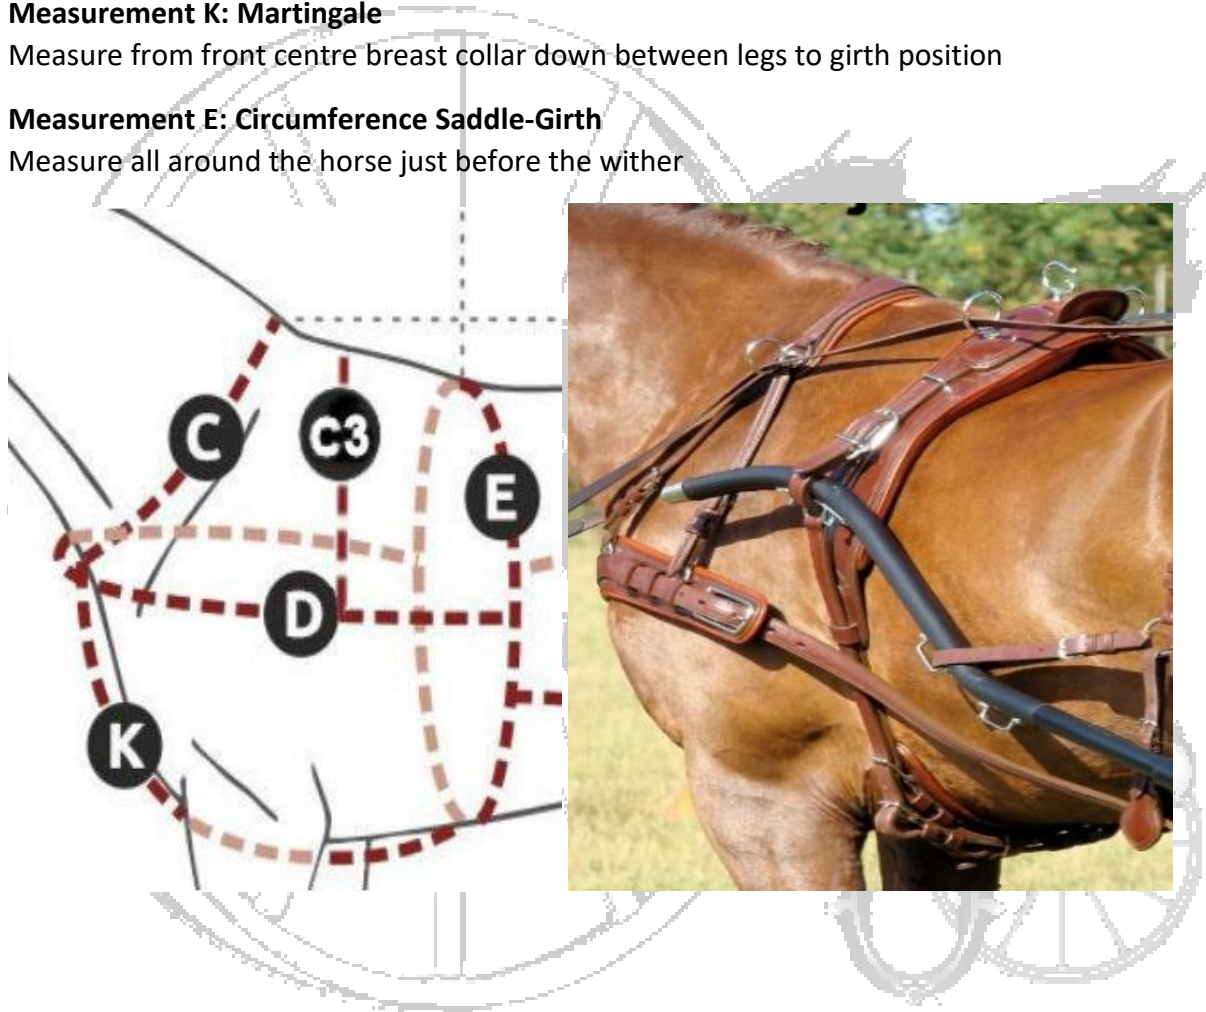

Measure middle of saddle pad around the front of the horse to middle of saddle pad the other side.

Measurement K: Martingale

Measure from front centre breast collar down between legs to girth position

Measurement E: Circumference Saddle-Girth

Measure all around the horse just before the wither

Measurement F: Crupper

Measure from where the saddle would sit all along the back of the horse to where the tail starts.

Measurement G: Breaching 1 Horse (Single)

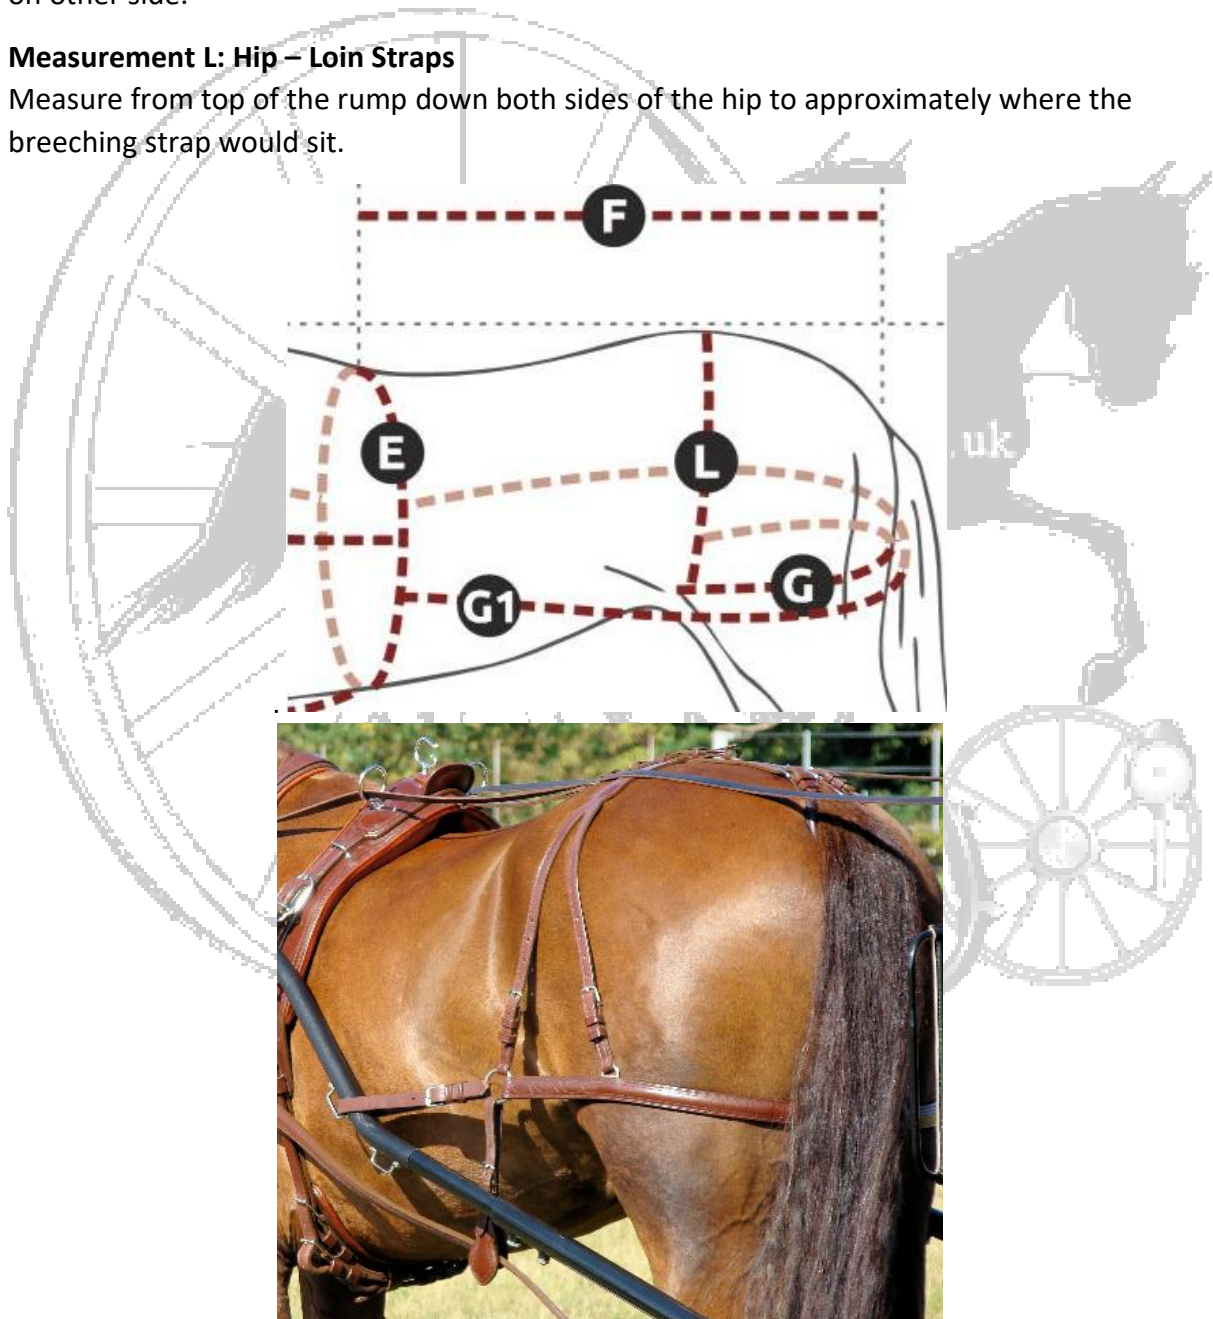

Measure from just in front of the stifle keeping the measure level around the bum of the horse to the other side same position just in front of the stifle (include the Rings).

Measurement G1: Breaching 2 Horse (Pair)

Measure from middle of saddle pad around the rear of the horse too middle of saddle pad on other side.

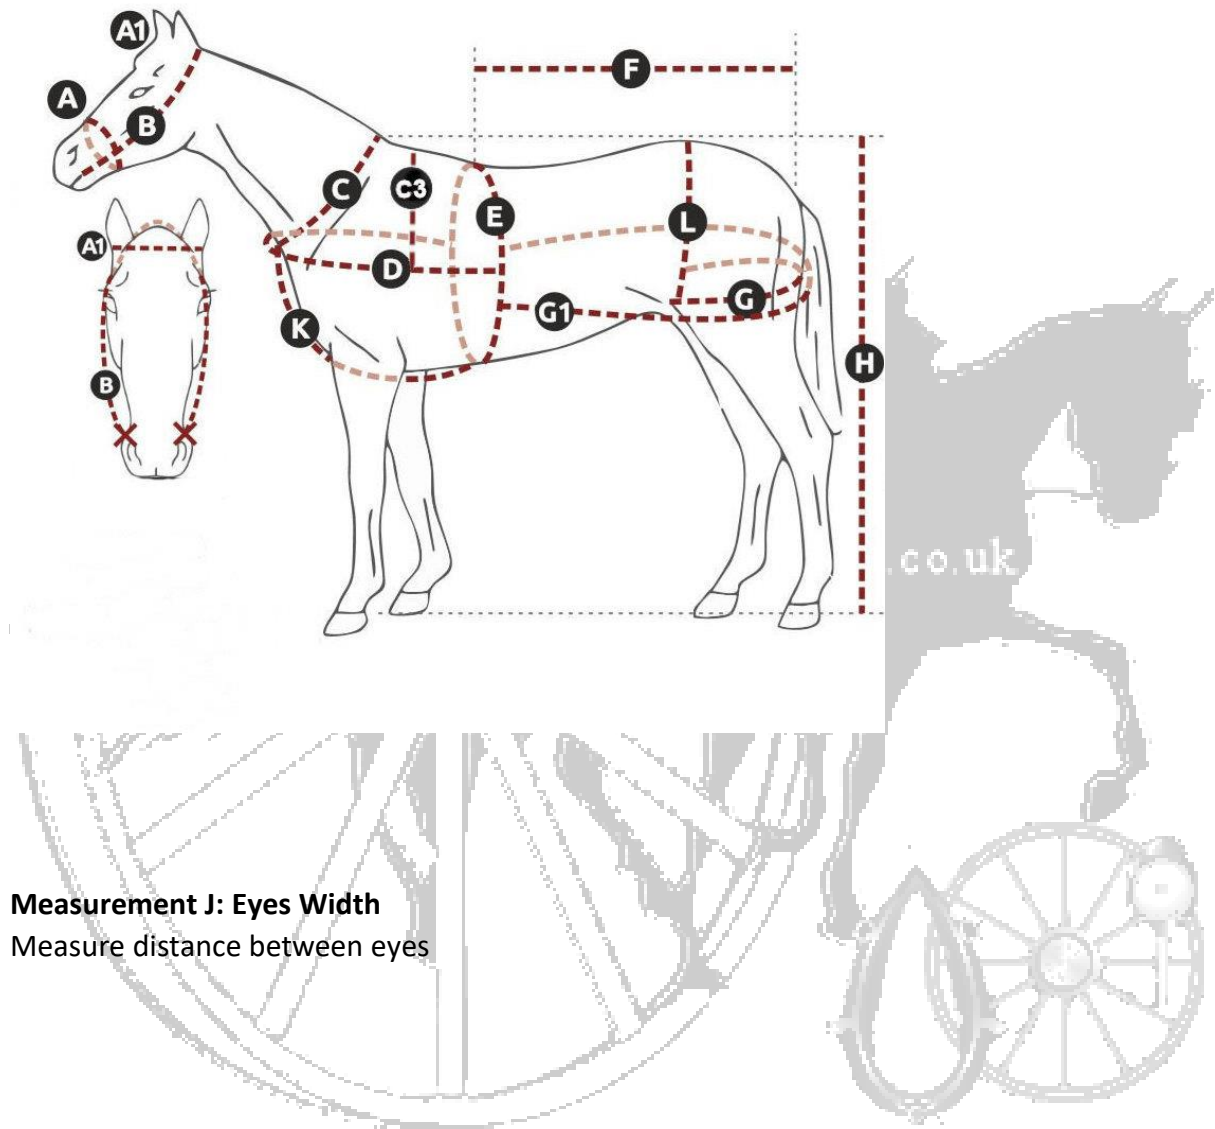

Measurement L: Hip – Loin Straps

Measure from top of the rump down both sides of the hip to approximately where the breaching strap would sit.

Measurement H: Horse height

Measure from the ground to the top of the withers.

Measurement J: Eyes Width

Measure distance between eyes

Measurement C1: Collar – French Collar Width

Measurement C2: Collar – French Collar Height

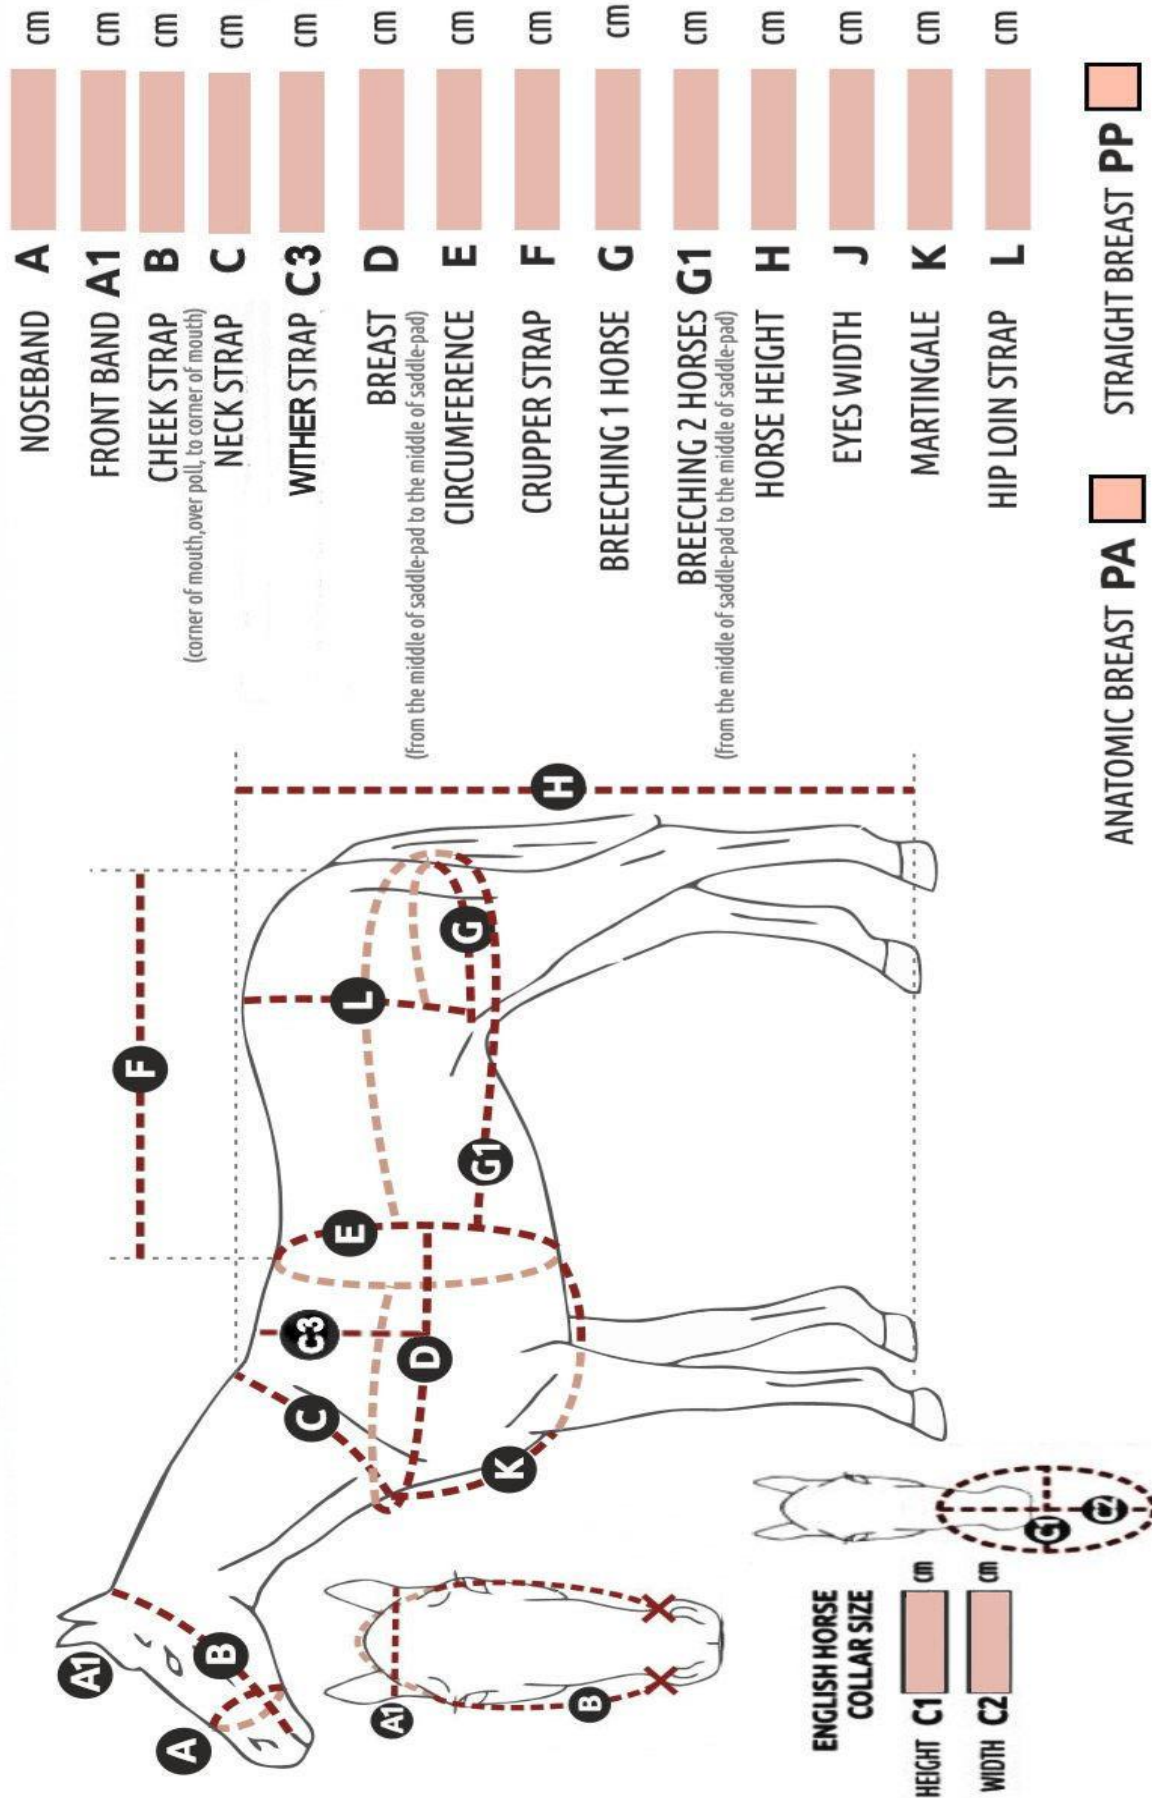

ENGLISH HORSE
COLLAR SIZE

Use of a measurement tool as below:
